

JOB BILLING

The BIS® Job Billing module allows you to easily and accurately bill for jobs on a Lump Sum or Cost Plus basis. It features billing according to The American Institute of Architects (AIA®) forms G702 (Application and Certificate for Payment), G703 (Continuation Sheet: Scheduled Values), and G701 (Change Order) formats.

Features:

- When BIS closes a billing, the General Ledger Financial Statements, Accounts Receivable, and cash accounts are automatically updated through BIS' Real-Time feature.
- Billings can be lump-sum or cost plus or percentage of completion.
- Maintains Schedule of Values, previous payments, work in place, stored materials, percent completed, total completed, balance, and retention per billing contract line items.
- Cost plus updates the billing according to the defined cost-plus markup for each cost type (labor, material, subcontract, or other direct cost).
- Billing for labor at calculated billing rate or using a manually entered billing rate.
- Allows for a maximum of 99,999 change orders per contract.
- Billing for change orders includes separate change orders markup.
- User-formatted Lien Release allows job data to be inserted directly into text.

Use your job budget to create the Schedule of Values, including user-defined markups.

Select job expenditures to include in the Schedule of Values. BIS adds your markup automatically.

View Schedule of Values for the original contract and change orders separately or the combined totals.
